**M. K. & T. or Mo. Pacific R. R., American
and Wells-Fargo Express Co's.**

PERSONAL TO MY PROSPECTIVE CUSTOMERS

Nursery and Horticultural work has been my chief occupation now for over 25 years. **I should know my business**, which for the Spring of 1914 will be conducted as follows: First, nothing but first-class high grade nursery stock will be handled and sold at fair living prices, neither as high as some people ask or probably as low as some others offer. (Extremes are nearly always wrong in anything.) No inferior cull trees or plants will knowingly be allowed to go out. Varieties will be true to label. **No substitution of varieties** unless by consent of the purchaser. Should an error occur and a variety prove untrue, on proof of same will either replace with stock that is true or refund the original purchase price at the option of the purchaser. **Any dissatisfied customer can have their money back on return of their order in good condition with charges prepaid.**

No Agents or Partners. The deal is between you and me.

Straight Square Business or no Trade..

If this appeals to you as safe, sane business, I want your orders and promise I will do my very best to please.

Yours for clean business,

H. W. JENKINS.

Small Fruit Plants.

STRAWBERRIES.

The first berry to ripen. The most attractive, highly colored and delicious berry grown; one that every farmer should grow for his table. Varieties offered have been fully tested here in Central Missouri and can be relied on to give satisfaction. Varieties marked P. (or pistilate) are female blossoms; those marked S. (or staminate variety) are male blossoms. These should be planted in proper proportion to fertilize the bloom. When selections are left with me, I always see they are properly mated.

Owing to the severe drought last season plants are scarce all over the Missouri Valley and prices for good plants may seem high. I only offer six varieties. All good ones; been tried.

| VARIETIES | Doz. | 100 | 1000 |
|--|------|--------|--------|
| Bubach, P. , largest berry grown; strong, healthy plants | 25c | \$1.00 | \$6.00 |
| Greenville, P. , a large productive berry; rather soft, fine plants | | | |
| Warfield, P. , med. size, very productive, dark red, makes lots of plants | | | |
| Sen. Dunlap, S. , deep red, productive, vigorous grower; good one | | | |
| Gandy, S. , large, very late, great plant maker..... | | | |
| Haverland, P. , fine plant, fine berry..... | | | |

RASPBERRIES

Raspberries follow strawberries, filling in the gap between strawberries and blackberries; a most desirable berry. The Raspberry family is divided into two classes. The black caps are propagated from the tips of canes and the red varieties grow from the roots like blackberries. The black caps are the most reliable and prolific.

| VARIETIES | Doz. | 100 | 1000 |
|---|------|--------|---------|
| Kansas , best early black, sure cropper..... | 30c | \$1.25 | \$10.00 |
| Cumberland , best all purpose black..... | 30c | 1.25 | 10.00 |
| Cuthbert , best red variety..... | 30c | 1.25 | 10.00 |

BLACKBERRIES

Blackberries.—This is the all-purpose dependable berry. Easily grown and seldom fails to make a crop. The varieties offered ripen in succession, extending the season from June to middle of August. Plants scarce.

| VARIETIES | Doz. | 100 |
|---|------|--------|
| Kenoyer , new variety, very early, large berry..... | 50c | \$2.00 |
| Early Harvest , early and prolific, medium size..... | | |
| Snyder , very hardy, never winter killed..... | | |
| Mersereau , new variety, large and fine..... | | |

GOOSEBERRIES

Gooseberries are a desirable berry to grow. Houghton and Downing are the standard tested varieties.

| VARIETIES | Each | Doz. |
|----------------|------|--------|
| Houghton | 15c | \$1.50 |
| Downing | | |

CURRANTS

Currants are a most excellent fruit for jellies and pastry; can be grown successfully if planted in the shade. North side of a fence is a good place for them.

| VARIETIES | Each | Doz. |
|--|------|--------|
| Pomona, very productive | 15c | \$1.20 |
| Red Cross, large size..... | | |
| Cherry, large and fine..... | | |
| Pres Wilder, one of the very best..... | | |

GRAPE VINES

Grape Vines.—Grapes can be grown every season if sprayed with Bordeaux Mixture. I recommend the following varieties:

| VARIETIES | Each | Doz. |
|---|------|--------|
| Moore's Early, best early black..... | 15c | \$1.50 |
| Concord, the old reliable black..... | 10c | 1.00 |
| Niagara, the best white, large | 15c | 1.50 |
| Woodruff, best red table, fine..... | 20c | 2.00 |
| Brighton, sweet, fine, table..... | 15c | 1.50 |
| Worden, better than Concord..... | 15c | 1.50 |
| Goethe, large and sweet..... | 20c | 2.00 |
| Virginia Seedling, fine wine grape..... | 15c | 1.50 |

Good assortment, \$1.20 a dozen.

GARDEN ROOTS

Garden Roots.—Rhubarb and Asparagus, two necessary things for good health, come early, at an opportune time in the spring. Should be in every garden. They never fail. Be sure to plant both this spring.

| | Each | Doz. | 100 |
|--|-------|--------|--------|
| Rhubarb, Myatts Linneas, 2-year roots..... | 10 | \$1.00 | |
| Rhubarb, Victoria variety, 1-year roots..... | 8 1-3 | .75 | |
| Asparagus, Giant Argenteuil, new French variety, 1-year roots | | .25 | \$1.00 |

Fruit Trees.

The trees I offer for sale have been propagated and grown by the best up-to-date methods. It matters not whether a tree has been grafted or budded, **piece root** or so-called **whole root grafts**, if it is a vigorous, straight, well developed tree with good roots and well shaped top, it is all right. If it is a cull the way it was grafted will not change it into a good tree, neither will a false name on the label change the fruit when it comes into bearing.

Apple Trees. In apple I carry a small but select stock of the best varieties adapted to Central Missouri.

| | |
|--|------|
| | Each |
| No. 1.—2-yr. $\frac{5}{8}$ and up caliper, 5 to 6 ft..... | 20c |
| No. 2.—2-yr. $\frac{1}{2}$ to $\frac{5}{8}$ caliper, medium 4 to 5 ft..... | 15c |

Varieties: Early Harvest, Yellow Transparent, Maiden Blush, Grimes Golden, Jonathan, Ben Davis, Wine Sap, Huntsman, Mammoth Black Twig, Gano, Janet, Ingram.

Cherry Trees. About the only trees worth planting in this climate are the Early Richmond or May Cherry (ripens in June), and the Montmorency, which is much the same in appearance only 10 days later.

| | |
|---|------|
| | Each |
| Strictly First Class, 5 to 6 ft. trees..... | 35c |
| Medium Grade, 4 to 5 ft. trees..... | 25c |

Pear Trees. The Keiffer and Garber are the only varieties of standard trees that live long enough to bear fruit and they sometimes blight.

| | |
|--|------|
| | Each |
| Standard trees, 5 to 6 ft., well branched..... | 25c |
| Medium size, branched | 20c |
| Dwarf Pear trees, No. 1 grade, 4 ft..... | 25c |
| Medium grade, 3½ ft..... | 20c |
| Varieties: Duchess and Seckle. | |

| | |
|--|------|
| | Each |
| Plum Trees. No. 1 best grade..... | 30c |
| Medium grade | 25c |
| Varieties: Abundance, Burbank, Wild Goose and Shropshire Damson. | |

Peach Trees. The Peach is such a delicious fruit that although it is killed sometimes several years in succession, yet people cannot afford to quit planting. When a peach season does come you want to have some trees ready to bear. Varieties offered are the very best on the market.

| | |
|---|------|
| | Each |
| Peach trees, No. 1, $\frac{5}{8}$ in. caliper, and 5 to 6 ft..... | 20c |
| Medium, $\frac{1}{2}$ to $\frac{5}{8}$ caliper, 4 ft..... | 15c |
| Less than $\frac{1}{2}$ in, 2 to 3 ft..... | 10c |

Varieties: Carman, Greensboro, Champion, Elberta. Stump the World, Picquet's Late, Henrietta Cling. Heath Cling, Salway and Chairs Choice.

Flower Bulbs and Shrubs.

In addition to my Small Fruit Plants, I have added a line of Flowers, which grow from bulbs and tubers, which bloom first season and are easily grown; also a select stock of Roses and Ornamental Shrubs and Trees.

CANNAS.

Cannas.—This semi-tropical plant is growing in popularity each season, and no lawn is complete without them. The varieties offered are my own growing and I know they are true to name.

| | Each | Doz. |
|---|------|--------|
| King Humbert , the finest of all bronze leaf Cannas, large red orchid type of flowers, a free bloomer, grows about 5 feet—a sure king among Cannas..... | 15c | \$1.20 |
| Louisiana , a fine Canna, glossy green foliage, large scarlet flowers, a continual bloomer until frost, grows about 6 ft.; a fit companion for King Humbert; strong, healthy tubers | 10c | .75 |
| Gladiator , a fine, extra glossy green leaf Canna, grows about 4 to 5 ft, large yellow flowers, yellow petals dotted with crimson red spots, very beautiful, continual bloomer; one of the best Cannas I ever saw—extra strong tubers..... | 15c | 1.20 |
| Richard Wallace , green foliage, grows about 4 feet, flowers large, bright canary color; a beautiful Canna..... | 10 | .75 |
| Wyoming , a fine Canna, green foliage, large copper colored orchid type flowers..... | 10c | .75 |

For a mixed order of Cannas, per dozen, \$1.00.

DAHLIAS

Dahlias.—This is an easy flower to grow and produce flowers till frost. The following will give you satisfaction:

| | Each |
|--|------|
| Wm. Agnew , finest red Dahlia grown; flowers very large and showy | 25c |
| C. A. Bruton , a magnificent yellow Dahlia..... | 25c |

GLADIOLUS

Gladiolus.—This beautiful and easy grown flower should be on every lawn. This flower lacks but one thing to be perfect—that is perfume or odor. In coloring it is perfection. My Gladiolus bed attracted much attention the past season and was admired by everyone. Bulbs I offer are large size—better than Eastern grown.

VARIETIES

| | Each | Doz. |
|---|-------|------|
| America , a florist is said to have paid \$4,000 for the original. It is a beautiful, soft, flesh pink, large spikes and flowers | 8 1-3 | 75c |
| Attraction , a large, beautiful flower, pure white center..... | 5c | 60c |
| Augusta , pure white flowers, blue anthers..... | 5c | 60c |
| Brenchleyensis , bright scarlet, fine bloomer..... | 8 1-3 | 75c |
| Crawford's Mixture , all colors imaginable..... | 5c | 50c |

Mexican Tube Rose. This is a beautiful pure white flower, borne on stems about 30 ins. high. Do not all open at once; is very fragrant. A bed will bloom from July until freezing weather. Fine for button-hole bouquets. Each, 5c; per dozen, 50c.

ROSES

Roses.—The Rose is the queen of flowers. Nothing compares with a beautiful rose for fragrance and beauty. Plants offered are large field-grown plants (not the small, potted greenhouse plants)—plants that should bloom first season.

Gen. Jacqueminot, brilliant crimson, one of the most popular roses, ever-bloomer—25c each.

La France, pale peach color, very fragrant—25c.

Crimson Rambler, needs no description—25c.

Paul Neyron, pink, very fine—25c each.

Frau Karl Druschki, pure white, a beautiful rose (new ever bloomer)—35c each.

Dorothy Perkins, shell pink, a vigorous climbing rose—25c each.

Flower of Fairfield, a continual blooming Crimson Rambler (new)—35c each.

ORNAMENTAL SHRUBS

Hydrangea Panniculata, blooms in fall, 2 to 3 ft.—25c each. In tree form 50c each.

Spirea Van Houttei, profuse bloomer—25c each.

Spirea Anthony Waterer, a continual bloomer—25c each.

ORNAMENTAL HEDGES

California Privet, 12 to 18 inches—\$5.00 per 100.

Berberis Thunbergii, a beautiful dwarf hedge plant, 12 inches, \$10.00 per 100.

ORNAMENTAL TREES

Catalpa Bungeii. This is a beautiful tree; perfectly hardy. A row of these line my driveway from road to house, and are admired by everyone. 6 to 8 feet, 1-year heads, \$1.50 each.

Teas Weeping Mulberry. This is a pretty tree and very hardy, suitable for cemetery planting. 2-year heads, \$1.50 each.

Norway Maple. This is a magnificent tree, very dense foliage, hardy but slow growth. 8 to 10 ft., \$1.50 each. 2-in. caliper, select specimens, \$2.50 each.

Caroline Poplar and Soft Maple for quick growth, 6 to 8 ft., 40c each.

Koster's Blue Spruce. This is the finest evergreen grown. Fine specimens. 2½ ft.; sacked with ball of dirt; \$3.00 each.

Camper Down Elm. This is one of the most graceful and beautiful trees for lawn. Don't grow tall, weeping habit of growth. 2 yr. heads, \$1.50 each.

My long experience in handling Nursery Stock is yours for the asking. Anything you want in the Nursery line, write me about it. Will be pleased to assist you in making selections for planting.

TERMS

Six at dozen rates; 50 at 100 rates; 500 at 1,000 rates. Freight prepaid on all orders for \$5.00 or more.

All stock sold guaranteed in good condition when delivered and true to name.

I do not claim to be infallible, so should any errors occur, and variety prove untrue to name, on proper proof I will either replace or refund the original price, but will not be responsible for any failure caused by conditions over which I have no control.

Orders from strangers must be accompanied by cash, or good references given, before shipment. Claims for shortage or damages must be made in six days from time of shipment or will not be allowed. **All Small Fruit plants packed in moss or shingle tow, and should be unpacked as soon as received, to keep from heating or drying out.**

Awaiting your orders,

H. W. JENKINS,
Boonville, Mo.

UNIVERSITY OF MISSOURI,
Agricultural Ex. Station,

No. 23.

Columbia, September 2, 1913.

CERTIFICATE OF NURSERY INSPECTION

This is to certify that, in accordance with the Nursery Inspection Act, passed by the 47th General Assembly, the nursery stock of the H. W. Jenkins Nursery, grown at Boonville, Cooper County, Mo., was inspected on August 27, 1913, by a duly authorized inspector and found apparently free from dangerous insects or plant diseases.

Valid till July 1, 1914, unless sooner revoked.

LEONARD HASEMAN,
Entomologist and Chief Inspector.
THOMAS J. TALBERT, Deputy Inspector.

**Cooper County Soil Produces the Products that Win the Prizes,
as was in evidence at the State Fair last Fall.**

**For six times awarded the Blue Ribbon for Sweepstakes on
Peaches at Sedalia.**

(Note)—Will plant this spring on Cooper County Court House grounds ornamental trees, shrubs and hedging.
